Utilizing Industries	Automotive industry | Construction industry | Skilled trades | Metalworking industry
Application	Deburring | Removing paint | Derusting | Removing scale | Polishing | Cleaning
Application Description	The knot cup brush is used for cleaning, derusting, polishing, removing paint and slag, and deburring.
Article Description Marketing	Cup brush with shank
On Stock as per Catalogue	Yes
Catalogue Page	83
Product Description short	Cup shank brush, with a diameter of 60 mm, shank diameter of 6 mm and steel wire filling

Product Description long	The cup shank brush is mounted in hand-operated grinders and flexible shafts. It is used for derusting and polishing, removing paint and dirt, and light deburring work. The steel filling is well suited to large steel surfaces. The aggressiveness is: moderate. The brush, with its permanently mounted 6 mm shank, is suitable for professional use. The dense wire filling and perfectly balanced running properties are characteristic of this product. Of premium "Made in Germany" quality, this product is primarily used in factories and the skilled trades for metalworking, in car repair shops, and in stair, railing and container construction.

Processed Surface	Steel | Cast iron

Description

Cup brushes with shank
Cup brushes with shank from LESSMANN are ideal for removing rust, paint and dirt, polishing and light deburring work. The integrated shank, dense filling and perfectly balanced running properties are characteristic of this all-round tool. Small- to medium-sized surface areas can be processed more easily by mounting brushes of this type in hand-operated grinders or flexible shafts.
