Utilizing Industries	Automotive industry | Construction industry | Skilled trades | Metalworking industry
Application	Deburring | Removing paint | Cleaning | Removing slag | Removing scale
Application Description	The end brush is used for cleaning, removing paint, slag and scale, and deburring.
Article Description Marketing	Crimped end brush with shank
On Stock as per Catalogue	No
Catalogue Page	86
Product Description short	End brush with a diameter of 24 mm, shank diameter of 6 mm and brass-coated stranded wire filling

Product Description long	The end brush can be mounted in hand-operated grinders or flexible shafts. It is used to work on hard-to-reach areas, and to clean corners, recessed spots and bore holes. It also is used to clean moulds/castings and to remove residual paint and rubber. The steel filling is suitable for steel surfaces. The brush, with its permanently mounted 6 mm shank, is suitable for professional use and for high-speed rotating tools. Of premium "Made in Germany" quality, this product is primarily used in factories and the skilled trades for metalworking, in car repair shops, and in stair, railing and container construction.

Processed Surface	Cast iron | Steel

Description

End brushes with shank
End brushes with shank from LESSMANN are used to best advantage to clean and deburr very hard-to-reach areas, remove residual paint and rubber, and to clean moulds and castings. They are also effective for working on corners, rounded contours and recessed areas inside bore holes. The brushes, with their permanently mounted shank, are suitable for professional use and for high-speed rotating tools.
