

Carbon fibre brushes

ArtNr. 047757

Carbon fibre brush CP with sleeve stainless dia 12 mm GL 75 mm carbon fibre trim length 40-43 mm thread M10 interior

Characteristics

Technical data

Art. Description ERP	Carbon fibre brush CP with sleeve stainless dia 12 mm GL 75 mm carbon fibre trim length 40-43 mm thread M10 interior
Brush Overall Length [GL]	75 mm
Filling Height [H]	40-43 mm
Net weight	0.019 kg
Housing Diameter [DH]	12 mm
Brush Diameter [D]	12 mm
Filling material	Carbon fibre
Thread Interior Diameter [GI]	M10
Housing Material	Stainless
Art. Group	Carbon fibre brushes CP

Order information

ArtNr	047757
EAN	4017359464304
Commodity code	96039099
Packing Unit	10 Stk./pcs./ud.
PEFC	No
Country of origin	D

Marketing

Utilizing Industries	Metalworking industry
Application	Removing heat discolouration Coating Marking Removing scale Polishing Cleaning Weld seam finishing
Application Description	The carbon fibre brush is used for cleaning, polishing, marking, and coating, for removing heat discolouration and scale.
Article Description Marketing	Carbon fibre brushes
On Stock as per Catalogue	Yes
Catalogue Page	149
Product Description short	Carbon fibre brush with stainless steel sleeve, total length of 75 mm, sleeve diameter of 12 mm, M10 external thread and 24K carbon fibre filling
Product Description long	The carbon fibre brush is suitable for many common weld cleaning machines. Can be used for a variety of purposes: cleaning and polishing stainless steel surfaces, marking and galvanising, coating. Of premium "Made in Germany" quality, this product is frequently used in the metalworking industry.

Keywords	Metalworking industry Removing heat discolouration Coating Marking Removing scale Polishing Cleaning Weld seam finishing Aluminium Stainless steel NF metals, hard Steel Titanium Carbon fibre Carbon fibre brushes Thread
Processed Surface	Aluminium Stainless steel NF metals, hard Titanium

Description

Carbon fibre brushes

Carbon fibre brushes from LESSMANN are the ideal tool for use in weld cleaning machines for electrochemical cleaning. Carbon fibre brushes typically are used for cleaning, polishing, marking and galvanising/coating. Thanks to the flexibility of the filling, the brushes can also easily reach hard-to-access areas and get clean results in no time at all. The brushes clean weld seams without leaving behind any residues, and finish surfaces without damaging them. Carbon fibre brushes are compatible with all commercial machines.
