Description

Spark plug brushes

Spark plug brushes from LESSMANN are used to manually remove dirt and deposits on soft and sensitive surfaces. The brushes have a thin wire filling, making them excellently suited to fine brush work.

Brush body PEFC-certified

These brushes are fabricated with a PEFC-certified beechwood body, meaning they contribute to supporting sustainable, regional forest management.

Low-sparking brushes

LESSMANN low-sparking brushes are recommended for working in areas where combustible or highly flammable vapours, liquids or dusts are present, and in all other situations in which sparks pose a potential risk of fire or an explosion hazard.
