Product Description long	This special brush is for cleaning brake callipers. It can effectively remove tough build-up caused by wearing brakes. This prevents any damage to the sensitive brake seals during cleaning. The brush is very aggressive and therefore suitable for general brush work or for cleaning welds. The steel wire filling is used on steel surfaces. The ergonomic, two-component handle makes the brake calliper brush easy to grip. Of premium "Made in Germany" quality, this product is frequently used in industrial companies, the skilled trades, car repair shops and metalworking plants.

Description

Hand brushes ROKI
ROKI hand brushes from LESSMANN are ideal for cleaning brake callipers. This brush can effectively remove the tough build-up caused by wearing brakes. With its two-component handle, the brush is very easy to grip; although the brush is also of very narrow design, the filling is exceedingly strong. This prevents any damage to the sensitive brake seals during cleaning. Thanks to its particularly good brushing effect and ergonomic handle, customers also use this brush for many other purposes, such as cleaning welds.

Brushes with two-component handles
These brushes meet all demands on modern, high-quality tools with optimised ergonomic features.
