Catalogue Page	96
Product Description short	ROKI brake calliper brush, with body length of 225 mm and brass wire filling in 2 rows

Product Description long

This special brush is for cleaning brake callipers. It can effectively remove tough build-up caused by wearing brakes. The brass wire brush is suitable for aluminium brake callipers. This prevents any damage to the sensitive brake seals during cleaning. The brush is very aggressive and therefore suitable for general brush work or for cleaning welds. The brass filling is used on soft and sensitive surfaces. The ergonomic, two-component handle makes the brake calliper brush easy to grip. Of premium "Made in Germany" quality, this product is frequently used in industrial companies, the skilled trades, car repair shops and metalworking plants.

Description

Hand brushes ROKI

ROKI hand brushes from LESSMANN are ideal for cleaning brake callipers. This brush can effectively remove the tough build-up caused by wearing brakes. With its two-component handle, the brush is very easy to grip; although the brush is also of very narrow design, the filling is exceedingly strong. This prevents any damage to the sensitive brake seals during cleaning. Thanks to its particularly good brushing effect and ergonomic handle, customers also use this brush for many other purposes, such as cleaning welds.

Brushes with two-component handles

These brushes meet all demands on modern, high-quality tools with optimised ergonomic features.
