

Single segment brush

ArtNr. 32016113

Single segment brushes RBE for band saw dia 100 x 14-18 mm EBD 12 mm tube 30 mm steel wire STA crimped 0.30 mm bore 13 mm trim length 21 mm

Characteristics

Technical data

Art. Description ERP	Single segment brushes RBE for band saw dia 100 x 14-18 mm EBD 12 mm tube 30 mm steel wire STA crimped 0.30 mm bore 13 mm trim length 21 mm
Filling Height [H]	21 mm
Filling Material Diameter	0.30 mm
Bore Diameter [DB]	13 mm
Net weight	0.13 kg
Filling Width [A]	14-18 mm
Number of Rows [RZ]	1
Clamping Width Cover Disc [EBD]	12 mm
Tube Diameter [R]	30 mm
RPM max.	8000
Brush Diameter [D]	100 mm
Clamping Width Tube [EB]	0 in
Clamping Width Tube [EB]	2.4 mm
Filling material	STA
Filling Material Shape	Crimped
Art. Group	Single segment brushes RBE

Order information

ArtNr	32016113
EAN	4017359438848
Commodity code	96035000
Packing Unit	5 Stk./pcs./ud.
PEFC	No
Country of origin	D

Marketing

Utilizing Industries	Automotive industry Skilled trades Metalworking industry
Application	Cleaning
Application Description	The single segment brush is used for cleaning the chip space in circular and band saws.
Article Description Marketing	Single segment brush
On Stock as per Catalogue	Yes
Catalogue Page	41
Product Description short	Single segment brush with a diameter of 100 mm, bore diameter of 13 mm and steel wire filling

Product Description long

The single segment brush is used in circular and band saws to clean the chip space. The motion of the blade or band causes the brush to roll off and press the chips out of the chip space. This prevents built-up edges and extends the service life of the blade. The brush is compatible with all common machines. Of premium "Made in Germany" quality, this product is frequently used in industrial companies and the skilled trades for metalworking and in the automotive supply sector.

Description

Single segment brushes

Single segment brushes from LESSMANN typically have a small clamping width and narrower filling width. They are used mainly for deburring work in stationary machines or machining centres. The design of these brushes makes it possible for them to be assembled into wide rollers.
