Description

Single segment brushes

Single segment brushes from LESSMANN typically have a small clamping width and narrower filling width. They are used mainly for deburring work in stationary machines or machining centres. The design of these brushes makes it possible for them to be assembled into wide rollers.

Wheel brushes with thread

Wheel brushes with thread from LESSMANN are ideal for getting into hard-to-reach areas. They usually are used on angle grinders to remove rust and paint or to clean welds. The brush, with its crimped wire and dense filling, ensures smooth and accurate rotary motion.
