Product Description short	Wheel brush with a diameter of 150 mm, adapter set 3, brass side plates and bronze wire filling

Product Description long	The wheel brush is mainly used for deburring work in stationary machines or machining centres. The version with bronze wire is used on soft and sensitive surfaces. This wheel brush is suitable for the following applications: Removing rust, paint, dirt, etc., and for roughening, deburring, stripping and polishing. The wire and tube diameters are determining factors for choosing the right article. The version with a large tube diameter (dimension R) contains more wire, offers harder action, and has a longer service life. Of premium "Made in Germany" quality, this product is frequently used in industrial companies and the skilled trades for metalworking, in automotive supply and construction firms, as well as in the plastics, rubber, chemical and medical equipment industries.

Description

Wheel brushes
Wheel brushes from LESSMANN are used for a variety of purposes in surface finishing. They are ideal for removing rust, paint, or dirt, and for roughening, deburring, stripping and polishing.

Low-sparking brushes
LESSMANN low-sparking brushes are recommended for working in areas where combustible or highly flammable vapours, liquids or dusts are present, and in all other situations in which sparks pose a potential risk of fire or an explosion hazard.
