Product Description long	The deburring wheel brush is mainly used for deburring work in stationary machines, tabletop deburring machines and machining centres. The version with brass-coated stranded wire STL is used on steel surfaces. This wheel brush is suitable for the following applications: Removing rust, paint, dirt, etc., and for roughening, deburring, stripping and polishing. The special brush has a high wire content, extremely uniform distribution of filaments, and every single brush is tested. What is more, these brushes have a longer service life thanks to the premium grade wire used. All brushes are fitted with a double keyway. Deburring brushes with stranded wire are particularly suited to working on very hard materials. The multistrand structure gives the individual wires added support, which significantly enhances the brushing effect. Of premium "Made in Germany" quality, this product is frequently used in industrial companies and the skilled trades for metalworking and in the automotive supply sector.
