Product Description short	Deburring wheel brush, 55-60 mm wide, with a diameter of 250 mm and stainless stranded wire filling

Product Description long	The deburring wheel brush is mainly used for deburring work in stationary machines, tabletop deburring machines and machining centres. The version with stainless stranded wire ROL is used on stainless steel and aluminium surfaces. This wheel brush is suitable for the following applications: Removing rust, paint, dirt, etc., and for roughening, deburring, stripping and polishing. The special brush has a high wire content, extremely uniform distribution of filaments, and every single brush is tested. What is more, these brushes have a longer service life thanks to the premium grade wire used. All brushes are fitted with a double keyway. Deburring brushes with stranded wire are particularly suited to working on very hard materials. The multistrand structure gives the individual wires added support, which significantly enhances the brushing effect. Of premium "Made in Germany" quality, this product is frequently used in industrial companies and the skilled trades for metalworking and in the automotive supply sector.
