Product Description long	The deburring roller brush is mainly used in deburring machines. The version with steel wire is used on steel surfaces. The dense filling sets this special roller brush apart. The roller brush is balanced without balancing weights, meaning it runs smoothly, with low vibration, throughout its service life. Of premium "Made in Germany" quality, this product is frequently used in the metalworking and plastics industries.

Processed Surface	Steel

Description

Deburring roller brushes
These brushes are suitable for use in all common deburring machines. For example, they are used for deburring cut edges on tubes.
