Product Description short	Deburring roller brush, 600 mm wide, with a diameter of 300 mm and 120-grit silicon carbide bristles

Product Description long

The deburring roller brush is mainly used in deburring machines. The version with silicon carbide bristles is used on stainless steel and aluminium surfaces. The dense filling sets this special roller brush apart. The roller brush is balanced without balancing weights, meaning it runs smoothly, with low vibration, throughout its service life. Of premium "Made in Germany" quality, this product is frequently used in the metalworking and plastics industries.
