Product Description short	Wheel brush with a diameter of 350 mm, bore diameter of 50.8 mm, double keyway, adapter set 5 and stainless steel wire filling

Product Description long

The wheel brush is mainly used for deburring work in stationary machines or machining centres. The version with stainless steel wire is used on stainless steel and aluminium surfaces. This wheel brush is suitable for the following applications: Removing rust, paint, dirt, etc., and for roughening, deburring, stripping and polishing. The wire and tube diameters are determining factors for choosing the right article. The version with a large tube diameter (dimension R) contains more wire, offers harder action, and has a longer service life. Of premium "Made in Germany" quality, this product is frequently used in industrial companies and the skilled trades for metalworking, in automotive supply and construction firms, as well as in the plastics, rubber, chemical and medical equipment industries.
