LESSMANN®
THE GERMAN BRUSH COMPANY

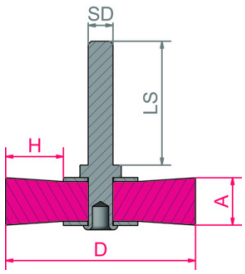

DATASHEET

Miniature wheel brush with shank

ArtNr. 410892

Mini wheel brushes SRBK with 3 x 37 mm shank dia 19 x 2 mm abrasive nylon SIC crimped K800 / 0.25 mm trim length 5 mm

Characteristics

Technical data

Filling Height [H]	5 mm
Brush Diameter [D]	19 mm
Grit	K800
Filling Material Diameter	0.25 mm
Net weight	0.004 kg
Art. Description ERP	Mini wheel brushes SRBK with 3 x 37 mm shank dia 19 x 2 mm abrasive nylon SIC crimped K800 / 0.25 mm trim length 5 mm
Filling Width [A]	2 mm
RPM max.	10000
Shank Diameter [SD]	3 mm
Shank Length [LS]	37 mm
Overall Height [GH]	43 mm
Number of Rows [RZ]	1
Tube Diameter [R]	- mm
Filling material	SIC
Filling Material Shape	Crimped
Art. Group	Wheel brushes SRBK

Order information

ArtNr	410892
EAN	4017359438817
Packing Unit	10 Stk./pcs./ud.
Commodity code	96035000
PEFC	No
Country of origin	D

Marketing

Utilizing Industries	Electrical engineering | Skilled trades | Metalworking industry
Application	Deburring | Removing slag | Removing scale | Rounding edges | Polishing | Cleaning | Grinding | Weld seam finishing | Structuring
Application Description	The miniature wheel brush is used for cleaning and polishing, processing welds, deburring, rounding edges, grinding, structuring, and removing slag and scale.
Article Description Marketing	Miniature wheel brush with shank
On Stock as per Catalogue	No
Catalogue Page	91
Product Description short	Miniature wheel brush with a diameter of 19 mm, shank diameter of 3 mm and 800-grit silicon carbide bristles

info@lessmann.com | +49 9082 707-0

Product Description long	The miniature wheel brush is suitable for polishing, cleaning, rounding edges or deburring small surface areas or workpieces. This brush can be used on metal surfaces, steel, aluminium, cast iron, plastic, stone or wood. The miniature wheel brush can be used, for instance, to remove slag and scale from weld seams or soldered joints. Its high-quality silicon carbide bristles meet these special requirements. With its shank diameter of 3 mm, the miniature brush can be mounted in hand-operated grinders. Of premium "Made in Germany" quality, this product is frequently used in industrial companies and the skilled trades for metalworking, precision tools, precision mechanics, electronic components, pneumatics and hydraulics.

Processed Surface	Aluminium | Concrete | Stainless steel | Cast iron | Wood | Plastic | Steel

Description

Miniature brushes
Miniature brushes from LESSMANN are suitable for polishing, cleaning, or deburring small surface areas or workpieces. For example, they can remove slag and scale from weld seams or soldered joints. These brushes can be used on metal surfaces, steel, aluminium, cast iron, plastic, stone or wood. On account of their size, they are ideal for work on precision tools or electronic components, and for use in precision mechanics, pneumatics and hydraulics. These brushes usually are used in hand-operated grinders.
