Product Description long

The wheel brush is suitable for deburring, rounding edges, polishing and structuring stainless steel, aluminium and plastic in hand-operated grinders or flexible shafts. Its high-quality silicon carbide bristles meet these special requirements. Material removal from the workpiece is abrasive. It can be used for light deburring work. The wheel brush, with its integrated 6 mm shank, is suitable for professional use. The dense filling and perfectly balanced running properties are characteristic of this all-round tool. Of premium "Made in Germany" quality, this product is primarily used in factories and the skilled trades for metalworking, in car repair shops, and in stair, railing and container construction.

Description

Wheel brushes with shank

Wheel brushes with shank from LESSMANN are ideal for removing rust, paint and dirt, cleaning welds, and light deburring work. The integrated shank, dense filling and perfectly balanced running properties are characteristic of this all-round tool. Hard-to-reach areas can be processed more easily by mounting brushes of this type in hand-operated grinders or flexible shafts.
