Product Description short	DIY Cup shank brush, with a diameter of 50 mm, shank diameter of 6 mm and 80-grit silicon carbide bristles

Product Description long

The cup shank brush is mounted in hand-operated grinders and flexible shafts. It is used for derusting and polishing, removing paint and dirt, rounding edges and light deburring work. Its high-quality silicon carbide bristles meet these special requirements. The brush, with its permanently mounted 6 mm shank, is suitable for professional use. The dense filling and perfectly balanced running properties are characteristic of this all-round tool. Of premium "Made in Germany" quality, this product is primarily used in factories and the skilled trades for metalworking, in car repair shops, in stair, railing and container construction, as well as in the skilled trade and by DIYers.

Description

Cup brushes with shank

Cup brushes with shank from LESSMANN are ideal for removing rust, paint and dirt, polishing and light deburring work. The integrated shank, dense filling and perfectly balanced running properties are characteristic of this all-round tool. Small- to medium-sized surface areas can be processed more easily by mounting brushes of this type in hand-operated grinders or flexible shafts.

DIY brushes

In its DIY line of brushes, LESSMANN offers a full selection of low-cost alternatives to the professional tools.
