

Miniature cup brush with shank

ArtNr. 430873

Miniature surface brushes STBK with 3 x 37 mm shank dia 18 mm abrasive nylon SIC crimped K320 / 0.55 mm trim length 6 mm

Characteristics

Technical data

Art. Description ERP	Miniature surface brushes STBK with 3 x 37 mm shank dia 18 mm abrasive nylon SIC crimped K320 / 0.55 mm trim length 6 mm
Overall Height [GH]	51 mm
Filling Height [H]	6 mm
Grit	K320
Filling Material Diameter	0.55 mm
Net weight	0.004 kg
Filling Width [A]	2 mm
Shank Diameter [SD]	3 mm
Shank Length [LS]	37 mm
RPM max.	15000
Brush Diameter [D]	18 mm
Number of Rows [RZ]	-
Tube Diameter [R]	- mm
Filling material	SIC
Filling Material Shape	Crimped
Art. Group	Cup shank brushes STBK

Order information

ArtNr	430873
EAN	4017359489925
Commodity code	96035000
Packing Unit	10 Stk./pcs./ud.
PEFC	No
Country of origin	D

Marketing

Utilizing Industries	Skilled trades Metalworking industry
Application	Deburring Removing paint Derusting Removing slag Removing scale Rounding edges Polishing Cleaning Grinding Weld seam finishing Structuring
Application Description	The miniature cup brush is used for cleaning and polishing, processing welds, deburring, rounding edges, grinding, structuring and removing rust, paint, slag and scale.
Article Description Marketing	Miniature cup brush with shank
On Stock as per Catalogue	No
Catalogue Page	91
Product Description short	Miniature cup brush with a diameter of 18 mm, shank diameter of 3 mm and 320-grit silicon carbide bristles

Product Description long

The miniature cup brush is suitable for polishing, cleaning, rounding edges or deburring small surface areas or workpieces. This brush can be used on metal surfaces, steel, aluminium, cast iron, plastic, stone or wood. The miniature cup brush can be used, for instance, to remove slag and scale from weld seams or soldered joints. Typical fields of use include precision tools, precision mechanics, electronic components, pneumatics and hydraulics. Its high-quality silicon carbide bristles meet these special requirements. With its shank diameter of 3 mm, the miniature brush can be mounted in hand-operated grinders. Of premium "Made in Germany" quality, this product is frequently used in industrial companies and the skilled trades for metalworking, precision tools, precision mechanics, pneumatics and hydraulics.

Description

Miniature brushes

Miniature brushes from LESSMANN are suitable for polishing, cleaning, or deburring small surface areas or workpieces. For example, they can remove slag and scale from weld seams or soldered joints. These brushes can be used on metal surfaces, steel, aluminium, cast iron, plastic, stone or wood. On account of their size, they are ideal for work on precision tools or electronic components, and for use in precision mechanics, pneumatics and hydraulics. These brushes usually are used in hand-operated grinders.
