

Crimped cup brush

ArtNr. 446777

Cup brushes TB dia 100 mm steel wire brassed STM crimped 0.35 mm thread M14 trim length 30 mm with straight filling

Characteristics

Technical data

Art. Description ERP	Cup brushes TB dia 100 mm steel wire brassed STM crimped 0.35 mm thread M14 trim length 30 mm with straight filling
Filling Height [H]	30 mm
Filling Material Diameter	0.35 mm
Net weight	0.55 kg
Tube Diameter [R]	50 mm
RPM max.	9000
Brush Diameter [D]	100 mm
Number of Rows [RZ]	1
Filling Width [A]	19-22 mm
Filling material	STM
Filling Material Shape	Crimped
Thread Interior Diameter [GI]	M14
Art. Group	Cup brushes TB

Order information

ArtNr	446777
EAN	4017359415795

Country of origin	D

Marketing

Utilizing Industries	Metalworking industry
Application	Deburring Removing paint Derusting Removing scale Polishing Cleaning
Application Description	The cup brush is used for derusting, polishing, deburring, cleaning, and removing paint and scale.
Article Description Marketing	Crimped cup brush
On Stock as per Catalogue	No
Version	straight filling
Catalogue Page	63
Product Description short	Cup brush with a diameter of 100 mm, M14 thread and brass-coated steel wire filling

Product Description long	The cup brush is suitable for use in machining centres, for deburring and removing rust, paint, dirt and scale. The brush with brass-coated steel wire is used for working flexibly on large steel surfaces. The dense filling, smooth and accurate rotary motion, and straight cup set this cup brush apart. Thanks to these features, the filling is not pushed outwards as much, meaning that more of the bristle tips act on the surface. Of premium "Made in Germany" quality, this product is frequently used in the metalworking industry.

Description

Crimped cup brushes

Crimped cup brushes from LESSMANN are used in angle grinders to process large surface areas. They are ideal for derusting, polishing, or removing paint, dirt or scale. The dense filling with crimped wire and the smooth and accurate rotary motion set this brush apart.

Brushes with straight filling

Due to the straight cup, the filling is not pushed outwards as much, meaning that more of the bristle tips act on the surface. These brushes are used for deburring surfaces, primarily in machining centres.
