

Miniature end brush with shank

ArtNr. 450001SB

Mini end brushes SPB with 3 x 26 mm shank dia 5 mm GL 45 mm bristles black trim length 8 mm

Characteristics

Technical data

Art. Description ERP	Mini end brushes SPB with 3 x 26 mm shank dia 5 mm GL 45 mm bristles black trim length 8 mm
Brush Overall Length [GL]	45 mm
Filling Height [H]	8 mm
Net weight	0.002 kg
Shank Diameter [SD]	3 mm
Housing Diameter [DH]	5 mm
Shank Length [LS]	26 mm
RPM max.	15000
Brush Diameter [D]	5 mm
Filling Material Diameter	- mm
Filling material	Bristles
Filling Material Shape	-
Filling Material Color	Black
Art. Group	End brushes SPB

Order information

ArtNr	450001SB
EAN	4017359490846
Commodity code	96035000
Packing Unit	10 Stk./pcs./ud.
PEFC	No
Country of origin	D

Marketing

Utilizing Industries	Skilled trades Metalworking industry
Application	Removing slag Dusting Removing scale Polishing Cleaning Weld seam finishing
Application Description	The miniature end brush is used for cleaning, dusting and polishing, processing welds and removing paint, slag and scale.
Article Description Marketing	Miniature end brush with shank
On Stock as per Catalogue	Yes
Catalogue Page	91
Product Description short	Miniature end brush with a diameter of 5 mm, shank diameter of 3 mm and black bristles

Product Description long

The miniature end brush is suitable for polishing or cleaning small surface areas or workpieces. This brush can be used on metal surfaces, steel, aluminium, cast iron, plastic, stone or wood. The miniature end brush can be used, for instance, to remove slag and scale from weld seams or soldered joints. Typical fields of use include precision tools, precision mechanics, electronic components, pneumatics and hydraulics. The bristle filling is suitable for soft and sensitive surfaces. With its shank diameter of 3 mm, the miniature brush can be mounted in hand-operated grinders. Of premium "Made in Germany" quality, this product is frequently used in industrial companies and the skilled trades for metalworking, precision tools, precision mechanics, pneumatics and hydraulics.

Description

Miniature brushes

Miniature brushes from LESSMANN are suitable for polishing, cleaning, or deburring small surface areas or workpieces. For example, they can remove slag and scale from weld seams or soldered joints. These brushes can be used on metal surfaces, steel, aluminium, cast iron, plastic, stone or wood. On account of their size, they are ideal for work on precision tools or electronic components, and for use in precision mechanics, pneumatics and hydraulics. These brushes usually are used in hand-operated grinders.
