

Miniature end brush with shank

ArtNr. 450871A0

Mini end brushes SPBK with 3 x 26 mm shank dia 5 mm
 GL 46 mm abrasive nylon AO crimped K320 / 0.50 mm trim
 length 8 mm

Characteristics

Technical data

Art. Description ERP	Mini end brushes SPBK with 3 x 26 mm shank dia 5 mm GL 46 mm abrasive nylon AO crimped K320 / 0.50 mm trim length 8 mm
Brush Overall Length [GL]	46 mm
Filling Height [H]	8 mm
Filling Material Diameter	0.50 mm
Net weight	0.001 kg
Shank Diameter [SD]	3 mm
Housing Diameter [DH]	5 mm
Shank Length [LS]	26 mm
RPM max.	15000
Brush Diameter [D]	5 mm
Grit	K320
Filling material	AO
Filling Material Shape	Crimped
Art. Group	End brushes SPBK

Order information

ArtNr	450871A0
EAN	4017359490143

Packing Unit	10 Stk./pcs./ud.
PEFC	No
Country of origin	D

Marketing

Utilizing Industries	Skilled trades Metalworking industry
Application	Deburring Removing slag Removing scale Smoothing Rounding edges Polishing Cleaning Grinding Weld seam finishing Structuring
Application Description	The miniature end brush is used for cleaning, polishing and smoothing, processing welds, deburring, rounding edges, grinding, structuring and removing slag and scale.
Article Description Marketing	Miniature end brush with shank
On Stock as per Catalogue	No
Catalogue Page	91
Product Description short	Miniature end brush with a diameter of 5 mm, shank diameter of 3 mm and 320-grit aluminium oxide bristles

Product Description long

The miniature end brush is suitable for polishing, cleaning, rounding edges or deburring small surface areas or workpieces. This brush can be used on metal surfaces, steel, aluminium, cast iron, plastic, stone or wood. The miniature end brush can be used, for instance, to remove slag and scale from weld seams or soldered joints. Typical fields of use include precision tools, precision mechanics, electronic components, pneumatics and hydraulics. Its high-quality aluminium oxide bristles meet these special requirements. With its shank diameter of 3 mm, the miniature brush can be mounted in hand-operated grinders. Of premium "Made in Germany" quality, this product is frequently used in industrial companies and the skilled trades for metalworking, precision tools, precision mechanics, pneumatics and hydraulics.

Description

Miniature brushes

Miniature brushes from LESSMANN are suitable for polishing, cleaning, or deburring small surface areas or workpieces. For example, they can remove slag and scale from weld seams or soldered joints. These brushes can be used on metal surfaces, steel, aluminium, cast iron, plastic, stone or wood. On account of their size, they are ideal for work on precision tools or electronic components, and for use in precision mechanics, pneumatics and hydraulics. These brushes usually are used in hand-operated grinders.
