Product Description short	End brush with a diameter of 11 mm, shank diameter of 6 mm and encapsulated steel wire filling

Product Description long	The end brush can be mounted in hand-operated grinders or flexible shafts. It is suitable for removing rust, paint, etc. and cleaning welds. The steel filling is suitable for steel surfaces. The aggressiveness is: hard. The brush, with its permanently mounted 6 mm shank, is suitable for professional use. Because the filling is embedded in a tough polymer compound, its width remains constant during use and it is protected against premature breakage of individual wires. Of premium "Made in Germany" quality, this product is primarily used in factories and the skilled trades for metalworking, in car repair shops, and in stair, railing and container construction.

Description

End brushes with shank
End brushes with shank from LESSMANN are used to best advantage to clean and deburr very hard-to-reach areas, remove residual paint and rubber, and to clean moulds and castings. They are also effective for working on corners, rounded contours and recessed areas inside bore holes. The brushes, with their permanently mounted shank, are suitable for professional use and for high-speed rotating tools.
