Marketing

Utilizing Industries	Automotive industry | Construction industry | Skilled trades | Metalworking industry
Application	Deburring | Removing paint | Removing slag | Removing scale | Cleaning
Application Description	The end brush is used for cleaning, removing paint, slag and scale, and deburring.
Article Description Marketing	Crimped end brush with shank
On Stock as per Catalogue	Yes
Version	completely stainless
Catalogue Page	87
Product Description short	End brush with a diameter of 12 mm, shank diameter of 6 mm and stainless steel wire filling

Product Description long	The end brush can be mounted in hand-operated grinders or flexible shafts. It is used to work on hard-to-reach areas, and to clean corners, recessed spots and bore holes. It also is used to clean moulds/castings and to remove residual paint and rubber. The stainless steel filling is suitable for stainless steel and aluminium surfaces. The brush, with its permanently mounted 6 mm shank, is suitable for professional use and for high-speed rotating tools. Of premium "Made in Germany" quality, this product is primarily used in factories and the skilled trades for metalworking, in car repair shops, and in stair, railing and container construction.

Processed Surface	Aluminium | Stainless steel | Cast iron | Copper | Titanium | Zinc

Description

End brushes with shank
End brushes with shank from LESSMANN are used to best advantage to clean and deburr very hard-to-reach areas, remove residual paint and rubber, and to clean moulds and castings. They are also effective for working on corners, rounded contours and recessed areas inside bore holes. The brushes, with their permanently mounted shank, are suitable for professional use and for high-speed rotating tools.

Completely stainless brushes
In addition to the stainless steel filling, all the inner and outer parts of these brushes, e.g. shanks, side plates, rings and loops, are made of stainless steel. This makes these tools ideal for use in very damp and aggressive environments. These brushes do not have the green marking.
