Marketing

Utilizing Industries	Construction industry | Skilled trades | Metalworking industry | Automotive industry
Application	Structuring | Deburring | Removing paint | Derusting | Removing slag | Removing scale | Cleaning | Weld seam finishing
Application Description	The knot wheel brush is used for deburring, roughening, cleaning welds, and removing rust, paint, scale and slag.
Article Description Marketing	Knotted wheel brush with shank
On Stock as per Catalogue	Yes
Catalogue Page	143
Product Description short	Knot wheel brush with 18 knots, a diameter of 75 mm, shank diameter of 6 mm and filling of right-twisted steel wire knots

Product Description long	The knot wheel brush is used for rough brush work, for derusting, deburring and roughening. It is also used for removing paint, scale, slag and underseal. Hard-to-reach areas can be processed more easily by mounting brushes of this type in hand-operated grinders or flexible shafts. The wheel brush, with its permanently mounted 6 mm shank, is suitable for professional use. The aggressiveness is: coarse. Of premium "Made in Germany" quality, this product is frequently used in factories and the skilled trades for metalworking and in car repair shops.
Processed Surface	Titanium | Cast iron | Steel
