Marketing

Utilizing Industries	Construction industry Skilled trades Metalworking industry Shipbuilding Automotive industry
Application	Derusting Removing paint Removing slag Removing scale Cleaning Deburring
Application Description	The end brush is used for cleaning, removing paint, slag and scale, and deburring.
Article Description Marketing	Knotted end brush with shank
On Stock as per Catalogue	Yes
Catalogue Page	143
Product Description short	Knot end brush with 6 knots, a diameter of 19 mm, shank diameter of 6 mm and stainless steel wire filling

Product Description long

The knot end brush can be mounted in hand-operated grinders or flexible shafts. It is used to work on hard-to-reach areas, and to clean corners, recessed spots and bore holes. It also is used to clean moulds /castings and to remove residual paint and rubber. The stainless steel filling is suitable for stainless steel and aluminium surfaces. The aggressiveness is: hard. The brush, with its permanently mounted 6 mm shank, is suitable for professional use and for high-speed rotating tools. The brush opens more or less wide, depending on the RPM. Of premium "Made in Germany" quality, this product is primarily used in factories and the skilled trades for metalworking, in car repair shops, and in stair, railing and container construction.

Processed Surface	Bronze Stainless steel Cast iron Copper Titanium Zinc Aluminium
