| Product Description short     | End brush with a diameter of 12 mm, shank diameter of 6 mm and steel wire filling    |

#### Product Description long

The end brush can be mounted in hand-operated grinders or flexible shafts. It is used to work on hard-to-reach areas, and to clean corners, recessed spots and bore holes. It also is used to clean moulds/castings and to remove residual paint and rubber. The steel filling is suitable for steel surfaces. The aggressiveness is: moderate. The brush, with its permanently mounted 6 mm shank, is suitable for professional use and for high-speed rotating tools. Of premium "Made in Germany" quality, this product is primarily used in factories and the skilled trades for metalworking, in car repair shops, and in stair, railing and container construction.

## Description

### End brushes with shank

End brushes with shank from LESSMANN are used to best advantage to clean and deburr very hard-to-reach areas, remove residual paint and rubber, and to clean moulds and castings. They are also effective for working on corners, rounded contours and recessed areas inside bore holes. The brushes, with their permanently mounted shank, are suitable for professional use and for high-speed rotating tools.
