

Crimped end brush with shank

ArtNr. 466171

End brushes with 6 mm shank dia 11 mm long 71 mm steel wire STH slim crimped 0,35 mm high 25 mm

Characteristics

Technical data

Art. Description ERP	End brushes with 6 mm shank dia 11 mm long 71 mm steel wire STH slim crimped 0,35 mm high 25 mm
Brush Overall Length [GL]	71 mm
Filling Height [H]	25 mm
Filling Material Diameter	0.35 mm
Bore Diameter [DB]	10 mm
Net weight	0.033 kg
Shank Diameter [SD]	6 mm
Housing Diameter [DH]	12 mm
Shank Length [LS]	20 mm
RPM max.	12000
Brush Diameter [D]	11 mm
Filling material	STH
Filling Material Shape	Crimped
Art. Group	End brushes, special, SPBS

Order information

ArtNr	466171
EAN	4017359199251
Commodity code	96035000
Packing Unit	10 Stk./pcs./ud.
PEFC	No
Country of origin	D

Marketing

Utilizing Industries	Automotive industry Construction industry Skilled trades Metalworking industry
Application	Removing paint Derusting Deburring Cleaning Weld seam finishing
Application Description	The end brush is used for cleaning welds, deburring, derusting and removing paint.
Article Description Marketing	Crimped end brush with shank
On Stock as per Catalogue	Yes
Version	crimped
Catalogue Page	85
Product Description short	End brush with a diameter of 11 mm, shank diameter of 6 mm and steel wire filling

Product Description long	The end brush can be mounted in hand-operated grinders or flexible shafts. It is suitable for removing rust, paint, etc. and cleaning welds. The steel filling is suitable for steel surfaces. The brush, with its permanently mounted 6 mm shank, is suitable for professional use. Of premium "Made in Germany" quality, this product is primarily used in factories and the skilled trades for metalworking, in car repair shops, and in stair, railing and container construction.

Description

End brushes with shank

End brushes with shank from LESSMANN are used to best advantage to clean and deburr very hard-to-reach areas, remove residual paint and rubber, and to clean moulds and castings. They are also effective for working on corners, rounded contours and recessed areas inside bore holes. The brushes, with their permanently mounted shank, are suitable for professional use and for high-speed rotating tools.

End brushes with shank, crimped

The wire in these special end brushes with crimping is narrowly crimped. As a result, the brushes can be very densely filled and achieve a harder effect than brushes with conventional wire crimping.
