Processed Surface	Cast iron | Steel

Description

End brushes with shank
End brushes with shank from LESSMANN are used to best advantage to clean and deburr very hard-to-reach areas, remove residual paint and rubber, and to clean moulds and castings. They are also effective for working on corners, rounded contours and recessed areas inside bore holes. The brushes, with their permanently mounted shank, are suitable for professional use and for high-speed rotating tools.

End brushes with shank, square
These special tools can be used, for example, to clean blind holes, while also cleaning the bottom and side surfaces in one step. They are suitable for cleaning and light deburring, for example of bore holes.
