Marketing

Utilizing Industries	Automotive industry Construction industry Skilled trades Metalworking industry
Application	Deburring Removing paint Derusting Removing scale Polishing Cleaning
Application Description	The knot cup brush is used for cleaning, derusting, polishing, removing paint and slag, and deburring.
Article Description Marketing	Crimped bevel brush with shank
On Stock as per Catalogue	Yes
Catalogue Page	83
Product Description short	Bevel brush with a diameter of 95 mm, shank diameter of 6 mm and stainless steel wire filling

Product Description long

The bevel brush with shank is used for derusting, polishing, removing paint and dirt, and light deburring work on irregular surfaces. The stainless steel filling is suitable for stainless steel and aluminium surfaces. The brush, with its permanently mounted 6 mm shank, is suitable for professional use. The dense wire filling and perfectly balanced running properties are characteristic of this product. Of premium "Made in Germany" quality, this product is primarily used in factories and the skilled trades for metalworking, in car repair shops, and in stair, railing and container construction.

Description

Bevel brushes with shank

Bevel brushes with shank from LESSMANN, with their conical shape, are ideal for grooves, corners, creases, inside edges and irregular surfaces. The integrated shank, dense filling and perfectly balanced running properties are characteristic of this all-round tool. Work can be performed more easily by mounting brushes of this type in hand-operated grinders or flexible shafts. These brushes are also suitable for mounting on high-speed straight grinders and compressed-air drives.
