DATASHEET

Tube brush IBGD

ArtNr. 526111

Tube brushes IBGD with cap 160 x 100 mm cylindrical across dia 150 mm steel wire STA straight 0.50 mm thread W1/2" outer core wire black 4x 4.0 mm

Characteristics

Technical data

Filling Material Shape	Straight
Art. Description ERP	Tube brushes IBGD with cap 160 x 100 mm cylindrical across dia 150 mm steel wire STA straight 0.50 mm thread W1/2" outer core wire black 4x 4.0 mm
Brush Overall Length [GL]	160 mm
Filling Material Diameter	0.50 mm
Net weight	0.303 kg
Filling Length [BL]	100 mm
Twisted Wire Diameter	4.0 mm
Brush Length [L]	140 mm
RPM max.	1000
Brush Diameter [D]	150 mm
Filling material	STA
Thread External Diameter [GA]	W1/2"
Brush Shape	Cylindrical, crosswise
Twisted Wire Material	Black 4x
Tip Shape	With cap
Art. Group	Tube brushes

Order information

ArtNr	526111
EAN	4017359069516
Commodity code	96039099
Packing Unit	5 Stk./pcs./ud.
PEFC	No
Country of origin	D

Product Description short	Tube brush IBGD with a total length of 160 mm, diameter of 150 mm, W1/2" external thread and steel wire filling configured crosswise

info@lessmann.com | +49 9082 707-0

Product Description long	The tube brush is used to manually remove rust, dirt and paint. The steel filling, configured crosswise, is suitable for steel surfaces. The tube brush with external thread is a preferred choice in a wide variety of fields. It can be used to clean tubes, grates, sleeves and cylinders. The tube brush is also suitable for deburring cross bores. For use on interior areas, the diameter should be selected to match the workpiece. The external thread makes it possible to extend the brush using the corresponding handles. Of premium "Made in Germany" quality, this product is frequently used in the skilled trades, repair shops, industrial companies, by DIYers, and in the HVAC and plumbing sectors.

Processed Surface	Steel

Description

Tube brushes with thread
Tube brushes with thread from LESSMANN are a preferred choice in a wide variety of fields. They can be used to clean tubes, grates, sleeves and cylinders, and even to regulate the flow rate in pipeline systems. They are also used to deburr cross bores and the like.

Brushes with double spiral
These brushes are used mainly in relatively large diameters to work on hard materials. A double spiral is more stable and more resistant to untwisting, meaning the brush can be exposed to higher forces.
